

# PCN - 09 106

Issue Date: July 28 2009

<b>Product Name:</b>	Millipacs® Receptacle series		
	All Millipacs Right Angle and Vertical Receptacles starting with P/N's HM2R..., HM2S..., HM2E..... See enclosed list. (include but not limit to those Part numbers)		
<b>Product Manager:</b>	Talee Luo		
<b>Subject:</b>	Process Change Notification		
<b>Distribution:</b>	Global		
<b>Type of Change:</b>	Manufacturing Process Change		
<b>Change Description:</b>	<p>FCI has been offering gold plated Millipacs receptacle connectors complying with Telcordia CO and IEC performance levels.</p> <p>FCI is now introducing Palladium-Nickel with Gold Flash plating (GXT) as additional plating material for the Millipacs Receptacle series connectors. Millipacs with GXT plating has been tested against Telcordia CO and IEC performance levels. FCI will now have the flexibility of offering both the type (Gold or GXT) of plating material against the same specification. To strengthen the competitive position, FCI will switch to GXT option as preferred plating system for Millipacs Receptacle connectors.</p>		
<b>Reason for Change:</b>	Standardization of performance specification according to Telcordia GR-1217-CORE performance level 5 (CO) and IEC performance levels using Gold or Palladium Nickel alloy over gold flash (GXT) as plating materials in the contact area.		
<b>Affected Parts:</b>	Please find attached Affected PN list		
<b>Effective Date of Change:</b>	October	28	2009
<b>Last Time Buy Date:</b>	N/A	N/A	N/A
<b>Last Disty Return Date:</b>	N/A	N/A	N/A
<b>Datasheet Attached?</b>	Yes		
<b>Qual/Test Data Attached?</b>	Yes		
<b>Samples Availability Date:</b>	August	01	2009
<b>Available Alternatives?</b>	N/A <i>Part numbers will not change. Standard products maybe shipped with either Gold or GXT</i>
