

Parameter	Ratings	Units
Blocking Voltage	250	$V_P$
Load Current	150	$mA_{rms} / mA_{DC}$
On-Resistance (max)	25	$\Omega$

### Features

- Two Current Limited Relays in One Package
- 3750V<sub>rms</sub> Input/Output Isolation
- Low Drive Power Requirements
- High Reliability
- Arc-Free With No Snubbing Circuits
- FCC Compatible
- VDE Compatible
- No EMI/RFI Generation
- Small 8-Pin Package
- Flammability Rating UL 94 V-0
- Surface Mount and Tape & Reel Versions Available

### Applications

- Telecommunications
  - Telecom Switching
  - Tip/Ring Circuits
  - Modem Switching (Laptop, Notebook, Pocket Size)
  - Hook Switch
  - Dial Pulsing
  - Ground Start
  - Ringing Injection
- Instrumentation
- Multiplexers
- Data Acquisition
- Electronic Switching
- I/O Subsystems
- Meters (Watt-Hour, Water, Gas)
- Medical Equipment-Patient/Equipment Isolation
- Security
- Aerospace
- Industrial Controls

### Pin Configuration

### Description

LAA120L is a dual normally open (1-Form-A) Solid State Relay that has two independently controlled, optically coupled MOSFET switches with an additional current limiting circuit. The MOSFET switches and photovoltaic die employ optically coupled MOSFET technology to provide 3750V<sub>rms</sub> of input/output isolation.

The optically coupled outputs, that use patented OptoMOS architecture, are controlled by a highly efficient infrared LED.

This dual switch OptoMOS relay provides a more compact design solution than discrete single-pole relays in a variety of applications and saves board space by incorporating both switches in a single 8-Pin package.

### Approvals

- UL Certified Component: File E76270
- CSA Certified Component: Certificate 1175739
- EN/IEC 60950-1 Certified Component:  
Certificate available on our website

### Ordering Information

Part #	Description
LAA120L	8-Pin DIP (50/Tube)
LAA120LS	8-Pin Surface Mount (50/Tube)
LAA120LSTR	8-Pin Surface Mount (1,000/Reel)
LAA120PL	8-Pin Flat Pack (50/Tube)
LAA120PLTR	8-Pin Flat Pack (1,000/Reel)

Switching Characteristics of Normally Open (Form A) Devices

### Absolute Maximum Ratings @ 25°C

Parameter	Ratings	Units
Blocking Voltage	250	V <sub>P</sub>
Reverse Input Voltage	5	V
Input Control Current	50	mA
Peak (10ms)	1	A
Input Power Dissipation <sup>1</sup>	150	mW
Total Power Dissipation <sup>2</sup>	800	mW
Isolation Voltage, Input to Output	3750	V <sub>rms</sub>
Operational Temperature	-40 to +85	°C
Storage Temperature	-40 to +125	°C

<sup>1</sup> Derate linearly 1.33 mW / °C

<sup>2</sup> Derate linearly 6.67 mW / °C

*Absolute Maximum Ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.*

*Typical values are characteristic of the device at +25°C, and are the result of engineering evaluations. They are provided for information purposes only, and are not part of the manufacturing testing requirements.*

### Electrical Characteristics @ 25°C

Parameter	Conditions	Symbol	Min	Typ	Max	Units
<b>Output Characteristics</b>						
Load Current, Continuous <sup>1</sup>	-	I <sub>L</sub>	-	-	150	mA <sub>rms</sub> / mA <sub>DC</sub>
On-Resistance <sup>2</sup>	I <sub>L</sub> =150mA	R <sub>ON</sub>	-	12	25	Ω
Off-State Leakage Current	V <sub>L</sub> =250V <sub>P</sub>	I <sub>LEAK</sub>	-	-	1	μA
Switching Speeds	I <sub>F</sub> =5mA, V <sub>L</sub> =10V	t <sub>on</sub> t <sub>off</sub>	- -	- -	5 5	ms
Turn-On						
Turn-Off						
Output Capacitance	I <sub>F</sub> =0mA, V <sub>L</sub> =50V, f=1MHz	C <sub>OUT</sub>	-	50	-	pF
Load Current Limiting	-	I <sub>CL</sub>	190	235	280	mA
<b>Input Characteristics</b>						
Input Control Current to Activate	I <sub>L</sub> =Load Current	I <sub>F</sub>	-	-	5	mA
Input Control Current to Deactivate	-	-	0.4	0.7	-	mA
Input Voltage Drop	I <sub>F</sub> =5mA	V <sub>F</sub>	0.9	1.2	1.5	V
Reverse Input Current	V <sub>R</sub> =5V	I <sub>R</sub>	-	-	10	μA
<b>Common Characteristics</b>						
Input to Output Capacitance	V <sub>IO</sub> =0V, f=1MHz	C <sub>IO</sub>	-	3	-	pF

<sup>1</sup> If both poles operate, then the load current must be derated so that it does not exceed the package power dissipation value.

<sup>2</sup> Measurement taken within one second of on-time.

## Manufacturing Information

### Moisture Sensitivity

All plastic encapsulated semiconductor packages are susceptible to moisture ingress. IXYS Integrated Circuits classifies its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, **IPC/JEDEC J-STD-020**, in force at the time of product evaluation. We test all of our products to the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a Moisture Sensitivity Level (MSL) classification as shown below, and should be handled according to the requirements of the latest version of the joint industry standard **IPC/JEDEC J-STD-033**.

Device	Moisture Sensitivity Level (MSL) Classification
LAA120L / LAA120LS / LAA120PL	MSL 1

### ESD Sensitivity

This product is **ESD Sensitive**, and should be handled according to the industry standard **JESD-625**.

### Soldering Profile

Provided in the table below is the Classification Temperature ( $T_C$ ) of this product and the maximum dwell time the body temperature of this device may be ( $T_C - 5$ )°C or greater. The classification temperature sets the Maximum Body Temperature allowed for this device during lead-free reflow processes. For through-hole devices, and any other processes, the guidelines of **J-STD-020** must be observed.

Device	Classification Temperature ( $T_C$ )	Dwell Time ( $t_p$ )	Max Reflow Cycles
LAA120L	250°C	30 seconds	1
LAA120LS	250°C	30 seconds	3
LAA120PL	260°C	30 seconds	3

### Board Wash

IXYS Integrated Circuits recommends the use of no-clean flux formulations. Board washing to reduce or remove flux residue following the solder reflow process is acceptable provided proper precautions are taken to prevent damage to the device. These precautions include, but are not limited to: using a low pressure wash and providing a follow up bake cycle sufficient to remove any moisture trapped within the device due to the washing process. Due to the variability of the wash parameters used to clean the board, determination of the bake temperature and duration necessary to remove the moisture trapped within the package is the responsibility of the user (assembler). Cleaning or drying methods that employ ultrasonic energy may damage the device and should not be used. Additionally, the device must not be exposed to flux or solvents that are Chlorine- or Fluorine-based.

**MECHANICAL DIMENSIONS**

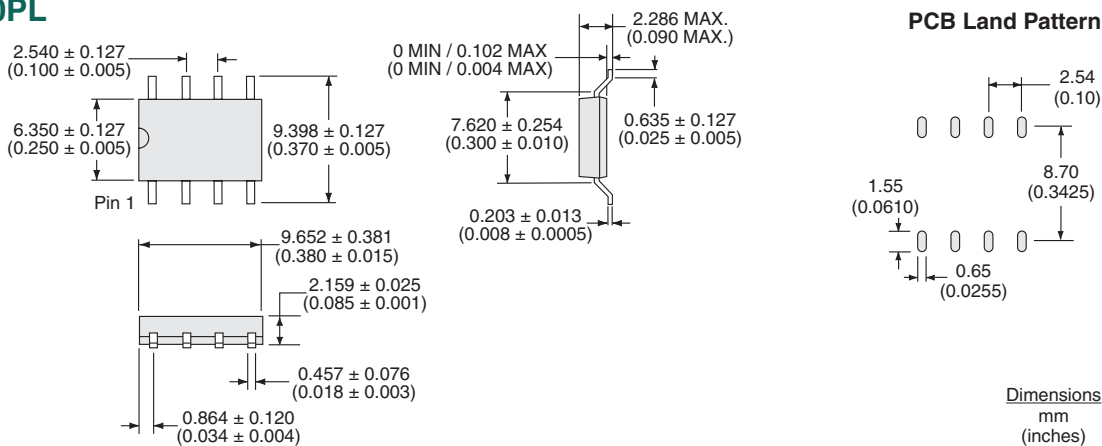

**LAA120L**

**LAA120LS**

**LAA120PL**

### MECHANICAL DIMENSIONS

#### LAA120LSTR Tape & Reel

- NOTES:**
1. Dimensions carry tolerances of EIA Standard 481-2
  2. Tape complies with all "Notes" for constant dimensions listed on page 5 of EIA-481-2

#### LAA120PLTR Tape & Reel

- NOTES:**
1. All dimensions carry tolerances of EIA Standard 481-2
  2. The tape complies with all "Notes" for constant dimensions listed on page 5 of EIA-481-2
