

## 500 mA very low drop voltage regulator

PPAK

DFN6 (2x2)

DFN6 (3x3)

DPAK

### Features

- Input voltage from 2.5 to 16 V
- Very low dropout voltage (300 mV max. at 500 mA load)
- Low quiescent current (200  $\mu$ A typ. @ 500 mA load)
- Available in 1 % precision in PPAK and DFN6 packages, 2 % in DPAK
- 500 mA guaranteed output current
- Wide range of output voltages available on request: adjustable from 0.8 V, fixed up to 12 V in 100 mV steps
- Logic-controlled electronic shutdown
- Power Good (PPAK and DFN packages)
- Fast dynamic response to line and load changes
- Internal current and thermal protection
- Temperature range: - 40 °C to 125 °C

### Applications

- PCs and laptop computers
- Battery-powered equipment
- Industrial and medical equipment
- Portable equipment

Maturity status link

LDFM

### Description

The LDFM is a fast, very low drop linear regulator which operates from an input supply voltage in the range of 2.5 V to 16 V.

It is available in fixed and adjustable output voltage versions, from 0.8 V to 12 V.

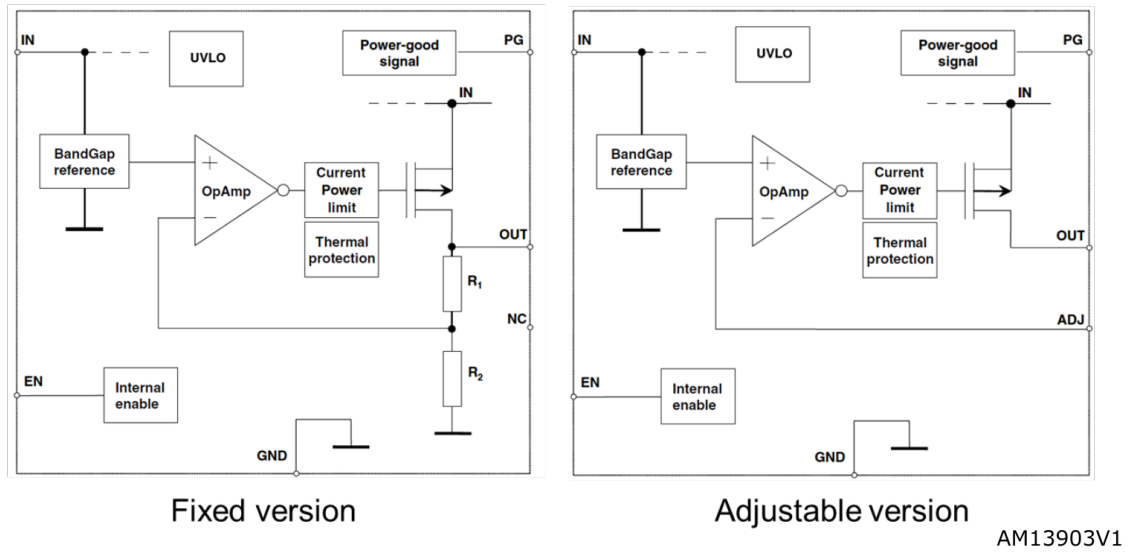

The LDFM features high output precision, very low dropout voltage, low noise, and low quiescent current, therefore suitable for low voltage microprocessors and memory applications.

Enable logic control pin and Power Good output are featured on PPAK/DFN packages.

Current and thermal protection are provided.

## 4 Absolute maximum ratings

**Table 3. Absolute maximum ratings**

Symbol	Parameter	Value	Unit
$V_{IN}$	DC input voltage	- 0.3 to 20	V
$V_{OUT}$	DC output voltage	- 0.3 to $V_{IN} + 0.3$	V
$V_{EN}$	Enable input voltage	- 0.3 to $V_{IN} + 0.3$	V
$V_{ADJ}$	Adjust pin voltage	- 0.3 to 2	V
$V_{PG}$	Power Good pin voltage	- 0.3 to $V_{IN} + 0.3$	V
$I_{LOAD}$	Output current	Internally limited	mA
$P_D$	Power dissipation	Internally limited	mW
$T_{STG}$	Storage temperature range	- 65 to 150	°C
$T_{OP}$	Operating junction temperature range	- 40 to 125	°C

**Note:** Absolute maximum ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. All values are referred to GND.

**Table 4. Thermal data**

Symbol	Parameter	Value				Unit
		PPAK	DPAK	DFN6-2x2	DFN6-3x3	
$R_{thJA}$	Thermal resistance junction-ambient	100	100	65	55	°C/W
$R_{thJC}$	Thermal resistance junction-case	8	8	6.5	10	°C/W

## 5 Electrical characteristics

$T_J = 25\text{ °C}$ ,  $V_{IN} = V_{OUT(NOM)} + 1\text{ V}$  ( For  $V_{OUT} < 1.5\text{ V}$ ;  $V_{IN} = 2.5\text{ V}$ .),  $C_{IN} = 1\text{ }\mu\text{F}$ ,  $C_{OUT} = 2.2\text{ }\mu\text{F}$ ,  $I_{LOAD} = 10\text{ mA}$ ,  $V_{EN} = 2\text{ V}$ , unless otherwise specified.

**Table 5. Electrical characteristics for LDFM (fixed versions)**

Symbol	Parameter	Test conditions	Min.	Typ.	Max.	Unit

$T_{SHDN}$	Thermal shutdown			170		$^{\circ}\text{C}$
	Hysteresis			10		

1. For  $V_{OUT} < 1.5\text{ V}$ ;  $V_{IN} = 2.5\text{ V}$ .
2. Dropout voltage is the input-to-output voltage difference at which the output voltage is 100 mV below its nominal value. This specification does not apply for output voltages below 1.5 V.

## 6 Application information

### 6.1 External capacitors

The LDFM requires external capacitors for regulator stability. These capacitors must be selected to meet the requirements of minimum capacitance and equivalent series resistance (see and ). It is advisable to locate the input/output capacitors as close as possible to the relative pins.

#### 6.1.1 Input capacitor

An input capacitor with a minimum value of 1  $\mu\text{F}$  is required with the LDFM. This capacitor must be located a distance of not more than 0.5" from the input pin of the device and returned to a clean analog ground. Any good quality ceramic capacitors can be used for this capacitor.

#### 6.1.2 Output capacitor

It is possible to use ceramic capacitors but the output capacitor must meet the requirements for minimum amount of capacitance and E.S.R. (equivalent series resistance) value.

A minimum capacitance of 2.2  $\mu\text{F}$  is a good choice to guarantee the stability of the regulator. However, other  $C_{\text{OUT}}$  values can be used according to and , showing the allowable ESR range as a function of the output capacitance.

The output capacitor must maintain its ESR in the stable region over the full operating temperature range to assure stability. Also, capacitor tolerance and variation with temperature must be kept in consideration in order to assure the minimum amount of capacitance at all times.

### 6.2 Enable pin operation

The Enable pin can be used to turn OFF the regulator when pulled down, so drastically reducing the current consumption. When the enable feature is not used, this pin must be tied to  $V_{\text{IN}}$  to keep the regulator output ON at all times. To assure proper operation, the signal source used to drive the Enable pin must be able to swing above and below the specified thresholds listed in the electrical characteristics section ( $V_{\text{EN}}$ ). The Enable pin must not be left floating because it is not internally pulled down/up.

### 6.3 Power Good

The LDFM features an open drain Power Good (PG) pin to sequence external supplies or loads and to provide fault detection. This pin requires an external resistor ( $R_{\text{PG}}$ ) to pull PG high when the output is within the PG tolerance window. Typical values for this resistor range from 10 k $\Omega$  to 100 k $\Omega$ .

## 7 Typical performance characteristics

$C_{IN} = C_{OUT} = 1 \mu\text{F}$ ,  $V_{IN} = V_{OUT} + 1 \text{ V}$ ,  $V_{EN}$  to  $V_{IN}$ ,  $I_{OUT} = 10 \text{ mA}$ , unless otherwise specified.

**Figure 40. DFN6 (3x3 mm) reel outline**

7875978\_N

**Table 14. DFN6 (3x3) tape and reel mechanical data**

Dim.	mm		
	Min.	Typ.	Max.
A0	3.20	3.30	3.40
B0	3.20	3.30	3.40
K0	1	1.10	1.20

## 9 Ordering information

**Table 15. Order code**

DKAK	PKAK	DFN6 (2x2)	DFN6 (3x3)	Output voltage
LDFM33DT-TR	LDFM33PT-TR	LDFM33PVR	LDFM33PUR	3.3 V
LDFM50DT-TR	LDFM50PT-TR			5 V
	LDFMPT-TR	LDFMPVR	LDFMPUR	ADJ from 0.8 V

## Revision history

**Table 16. Document revision history**

Date	Revision	Changes
28-Aug-2012	1	Initial release.
22-Nov-2013	2	<p>Part numbers LDFM and LDFM50 have been unified under LDFM.</p> <p>Updated the Features and the Description in cover page.</p> <p>Cancelled <i>Table 1: Device summary</i>.</p> <p>Updated <i>Section 2: Pin configuration</i>, <i>Section 3: Typical application</i>, <i>Section 4: Absolute maximum ratings</i>, <i>Section 5: Electrical characteristics</i> and <i>Section 8: Package information</i>.</p> <p>Added <i>Section 8.7: DFN6 (3 x 3 mm) packing information</i> and <i>Section 9: Order code</i>.</p> <p>Minor text changes.</p>
15-Jun-2015	3	<p>Updated <i>Table 5: Electrical characteristics for LDFM (fixed versions)</i> and <i>Table 6: Electrical characteristics for LDFM (adjustable version)</i>.</p> <p>Minor text changes.</p>
05-Sep-2016	4	<p>Updated <i>Section 9: "Ordering information"</i>.</p> <p>Minor text changes.</p>
05-Jul-2017	5	<p>Updated <i>Section 9: "Ordering information"</i>.</p> <p>Minor text changes.</p>
03-May-2021	6	<p>Added unit <math>\Delta V_{OUT}</math> in <i>Table 6</i>.</p> <p>Updated <i>Figure 6</i> and <i>Figure 14</i>.</p>
